NEW AT IMTS 2012

## **LMT Introduces Cutting Tool Measuring Machine at IMTS 2012**

Caro, Michigan, July 2012 – Laser Measuring Technologies, LLC, a division of The LMT Group is to unveil its new cutting tool measuring machine, the Accu-tool, in September at the IMTS (International Manufacturing Technology Show) in Chicago, IL.

The Accu-tool is specifically designed for the cutting tool industry, making production quicker and easier.

The Accu-tool offers a simple automatic screen calibration process and magnification capabilities from 20-470x zoom, it is sure to meet anyone's cutting tool measuring needs. The specially designed software works seamlessly with the Windows operating system supplied with each machine.

Visit the LMT Booth #N-6676 at IMTS 2012 for more information.

The LMT Group strives to bring customers the latest technology in metal marking, laser micro-machining, laser measuring, laser engraving, and laser cutting utilizing the most advanced components in the market today at the most competitive prices.
